HANDHELD DIRECTIONAL ANTENNAS

Experts in interference hunting

Product Brochure | Version 01.00

AT A GLANCE

Rohde & Schwarz handheld directional antennas can dependably detect and locate transmitters and interference sources from 8 kHz to 44 GHz.

The following antennas are available for various frequency ranges and applications:

R&S®HE400 HANDHELD DIRECTIONAL ANTENNA FAMILY

The antenna family uses a modular concept consisting of several antenna handles and antenna modules covering an overall frequency range from 8 kHz to 20 GHz. The R&S®HE400 antenna family supports the R&S®PR200 portable monitoring receiver, the R&S®PR100 portable receiver, the R&S®MNT100 RF interference locator and portable spectrum analyzers.

R&S®HF907DC SHF DIRECTIONAL ANTENNA WITH DOWNCONVERTER

The R&S®HF907DC consists of a downconverter with a directional antenna fixed to it. The antenna and downconverter cover a frequency range from 7.5 GHz to 18 GHz and can be used in conjunction with the R&S®PR200 portable monitoring receiver and R&S®PR100 portable receiver.

R&S®HE800-PA HANDHELD DIRECTIONAL ANTENNA WITH PREAMPLIFIER

The handheld antenna covers a very wide frequency range from 18 GHz to 44 GHz. The R&S®Spectrum Rider FPH handheld spectrum analyzer as well as suitable third-party handheld analyzers or receivers are supported.

APPLICATIONS

General interference hunting.

Spectrum monitoring and spectrum surveillance.

Mobile network testing and interference hunting.

General interference hunting

Rohde&Schwarz handheld antennas have directional radiation patterns, allowing users to detect and locate a potential interference source based on triangulation of multiple bearings. In highly reflective environments, i.e. indoors, the last few meters to the target are often found more easily by gradually approaching the transmitter (homing mode).

Spectrum monitoring and spectrum surveillance

The radio frequency spectrum is a limited natural resource and it is important that it be used in the most effective and efficient way. Smart planning of frequency usage and well-designed frequency allocation schemes are crucial. Spectrum monitoring can effectively help enforce compliance with international radio traffic regulations.

Rohde&Schwarz handheld antennas in combination with a receiver or an analyzer allow users to monitor and analyze relevant signal parameters such as the frequency, spectrum occupancy, signal level and signal bandwidth.

Mobile network testing and interference hunting in wireless communications networks

To ensure optimum performance of wireless communications networks, the network parameters are constantly monitored and analyzed. When an unknown or interfering signal is found, the source of the signal has to be identified. Highly accurate bearing results are needed to quickly locate and find the signal source.

Rohde&Schwarz handheld antennas are ideal for this task since they allow fast and reliable detection and localization of such sources over a very wide frequency range.

R&S®HE400

HANDHELD DIRECTIONAL

ANTENNA FAMILY

AT A GLANCE

The R&S®HE400 antenna family in combination with an analyzer or receiver reliably detects and locates transmitters and interference sources from 8 kHz to 20 GHz.

The R&S®HE400 handheld directional antenna family is used together with an analyzer or receiver to detect and locate transmitters and interference sources. Bearings are found by manually pointing the antenna in the direction where the signal is strongest.

The antenna family is optimized for use with the R&S®PR200 portable monitoring receiver, the R&S®PR100 portable receiver, the R&S®MNT100 RF interference locator and portable spectrum analyzers.

It consists of four antenna handles, seven different antenna modules and accessories (cables, transport cases, transport bags, tripod, adapter, rain covers, etc.) that can be individually chosen for a specific application. Other antenna modules can be added at a later stage.

Benefits and key features

- ▶ Modular product design to select the best antenna handle and antenna module for the customer application
- ▶ Compact with very wide frequency range from 8 kHz to 20 GHz to address a large range of applications and a multitude of customer applications
- ▶ Suitable for 5G New Radio FR1 frequency range
- ▶ Wideband antenna modules and optimized narrowband solutions available
- ▶ Distinct directional radiation pattern for precise location of interference sources
- ▶ Fast and convenient exchange of antenna modules
- ▶ Turnable antenna modules for reception of vertically or horizontally polarized signals
- ▶ Automatic detection of plugged-in module and polarization alignment (with R&S®HE400, R&S®HE400MW, R&S®HE400DC)
- ▶ Support of various Rohde&Schwarz receivers and analyzers
- ▶ Support of third-party receivers (with R&S®HE400BC)
- ▶ Trigger function for external triggering of the receiver or the analyzer (with R&S®HE400, R&S®HE400MW, R&S®HE400DC)
- ▶ Integrated electronic compass delivers exact azimuth and elevation angle (with R&S®HE400, R&S®HE400MW, R&S®HE400DC)
- ▶ Built-in sensitive GNSS-capable receiver for precise location by triangulation and use of geolocation data for further processing (with R&S®HE400, R&S®HE400MW, R&S®HE400DC)
- ▶ Switchable built-in low-noise amplifier (LNA) for optimum sensitivity in active mode and wide dynamic range in passive mode (with R&S®HE400, R&S®HE400MW and R&S®HE400DC)
- ▶ Power for antenna supplied by connected receiver or spectrum analyzer; no battery needed
- ▶ Unique and sophisticated bearing detection mode for highly accurate bearing results allows fast localization of signal sources (with R&S®HE400CEL, R&S®HE400SCB)
- ▶ Low antenna weight and attachable arm rest ensure fatigue-free operation
- ▶ R&S®HE400Z8 adapter to connect external antennas to the R&S®HE400DC antenna handle

ANTENNA HANDLES

R&S®HE400 handheld directional antenna with R&S®HE400VHF.

R&S®HE400MW microwave handheld directional antenna with R&S®HE400LP.

R&S®HE400BC basic handheld directional antenna with R&S®HE400HF.

R&S®HE400DC handheld directional antenna with downconverter and R&S®HE400SHF.

The R&S®HE400 antenna handle has an operational frequency range from 8 kHz to 8 GHz and supports all antenna modules up to this frequency. It is compatible with the R&S®PR200 portable monitoring receiver, the R&S®PR100 portable receiver, the R&S®MNT100 RF interference locator, the R&S®Spectrum Rider FPH, R&S®FSH4 and R&S®FSH8 handheld spectrum analyzers and the R&S®CableRider ZPH cable and antenna analyzer.

The R&S®HE400MW antenna handle operates from 20 MHz to 20 GHz. It supports the R&S®HE400VHF, R&S®HE400UWB, R&S®HE400LP, R&S®HE400CEL, R&S®HE400SCB and R&S®HE400SHF antenna modules and is compatible with the R&S®FPH13 and R&S®FPH26 handheld spectrum analyzers, the R&S®FSH13 and R&S®FSH20 handheld spectrum analyzers and the R&S®CableRider ZPH cable and antenna analyzer.

The R&S®HE400BC antenna handle is the cost-effective, basic version and covers the frequency range from 8 kHz to 20 GHz. It has a mechanical compass, is fully passive and does not require a power supply. The R&S®HE400BC supports the R&S®HE400HF, R&S®HE400VHF, R&S®HE400UWB, R&S®HE400LP and R&S®HE400SHF antenna modules. The R&S®HE400BC can be used with the R&S®PR200 portable monitoring receiver, the R&S®PR100 portable receiver, the R&S®MNT100 RF interference locator, the R&S®Spectrum Rider FPH and R&S®FSH handheld spectrum analyzers, the R&S®CableRider ZPH cable and antenna analyzer and any third-party receiver or spectrum analyzer.

The R&S®HE400DC antenna handle has an integrated downconverter. The antenna handle covers a frequency range from 20 MHz to 20 GHz and thereby extends the frequency range of the R&S®PR200 portable monitoring receiver from 8 GHz to 20 GHz. The downconverter is completely controlled by the R&S®PR200 portable monitoring receiver, allowing continuous operation. The antenna handle supports the R&S®HE400VHF, R&S®HE400UWB, R&S®HE400LP, R&S®HE400CEL, R&S®HE400SCB and R&S®HE400SHF antenna modules. The R&S®HE400DC is compatible with the R&S®HE400Z8 adapter that allows external antennas to be connected.

ANTENNA MODULES

The R&S®HE400HF antenna module covers a frequency range from 8 kHz to 30 MHz and is supported by the R&S®HE400 and R&S®HE400BC antenna handles.

The R&S®HE400VHF antenna module has an operational frequency range from 20 MHz to 200 MHz. The antenna module can be used with all antenna handles.

The frequency range of the R&S®HE400LP antenna module spans from 450 MHz to 8 GHz. The antenna module operates with all antenna handles.

The R&S®HE400CEL cellular antenna module and the R&S®HE400SCB S/C band antenna module offer a unique and sophisticated bearing detection mode that delivers highly accurate bearing results over the wide frequency range from 700 MHz to 2.5 GHz and 1.7 GHz to 6 GHz, respectively.

The antennas can be switched between normal mode, with a distinct maximum pointing to the front, and delta mode, where the radiation pattern exhibits a steep-edge indent at the boresight. Direction finding based on the minimum signal in delta mode allows users to find the signal source much more accurately and quickly. Both antenna modules are supported by the R&S®HE400, R&S®HE400MW and R&S®HE400DC antenna handles.

Operating mode (principle concept)

R&S®HE400MW microwave handheld directional antenna with R&S®HE400CEL.

R&S®HE400MW microwave handheld directional antenna with R&S®HE400SCB.

The R&S®HE400UWB antenna module covers the extremely wide frequency range from 30 MHz to 6 GHz with a single module, addressing the VHF, UHF and lower SHF range. The antenna module operates with all antenna handles.

The frequency range of the R&S®HE400SHF antenna module extends from 5 GHz to 20 GHz. The antenna module works with all antenna handles. With the R&S®HE400 antenna handle, the R&S®HE400SHF antenna module can be used up to 8 GHz.

The operating frequency range of the system depends on the lower and upper frequency of the antenna, the receiver or the analyzer.

R&S®HE400 handheld directional antenna with R&S®HE400UWB.

R&S®HE400MW microwave handheld directional antenna with R&S®HE400SHF.

R&S®HF907DC SHF DIRECTIONAL ANTENNA WITH DOWNCONVERTER AT A GLANCE

The R&S®HF907DC SHF directional antenna with downconverter together with a receiver can detect and locate transmitters and interference sources from 7.5 GHz to 18 GHz with high accuracy.

R&S®HF907DC SHF directional antenna
with downconverter.

The R&S®HF907DC consists of a downconverter and an antenna fixed to it. The R&S®HF907DC operates with the R&S®PR200 portable monitoring receiver and the R&S®PR100 portable receiver.

The downconverter divides the frequency range from 7.5 GHz to 18 GHz into two subbands. Band 1 ranges from 7.5 GHz to 12.5 GHz, while band 2 ranges from 12.5 GHz to 18 GHz.

The operating frequency range is downconverted to the range below 7.5 GHz in two switchable frequency bands.

The R&S®HF907DC extends the frequency range of the R&S®PR100 portable receiver to 18 GHz, enabling applications at higher frequencies.

Benefits and key features

- ▶ Wide frequency range from 7.5 GHz to 18 GHz to support a large range of applications
- ▶ Manual polarization switching (horizontal, vertical, 45°) for detection of signals with different polarization
- ▶ Distinct directional radiation pattern for precise location of interference sources
- ▶ Integrated LNA to increase system sensitivity
- ▶ Automatic frequency switching (when used with the R&S®PR100) for continuous operation
- ▶ Battery operation for portable applications
- ▶ Long operating time of rechargeable battery

R&S®HE800-PA HANDHELD DIRECTIONAL ANTENNA WITH PREAMPLIFIER AT A GLANCE

The R&S®HE800-PA handheld directional antenna with preamplifier together with an analyzer or receiver allows precise detection and location of transmitters and interference sources in the very wide frequency range from 18 GHz to 44 GHz.

R&S®HE800-PA handheld directional antenna with preamplifier.

The R&S®HE800-PA is optimized to be used with the R&S®Spectrum Rider FPH handheld spectrum analyzer using the R&S®FPH-B31 spectrum analyzer frequency upgrade option as well as suitable third-party handheld analyzers and receivers.

The support of handheld analyzers and receivers in the microwave range makes the antenna ideal for applications in this frequency range, such as interference hunting in 5G mobile networks.

The R&S®HE800-PA consists of an antenna handle, a fixed antenna module behind the foam radome and an RF and supply cable to the analyzer.

Benefits and key features

- ▶ Compact size with extremely wide frequency range from 18 GHz to 44 GHz to address various applications
- ▶ Distinct directional radiation pattern for precise location of interference sources
- ▶ Integrated LNA to increase system sensitivity
- ▶ Wide dynamic range
- ▶ Power for antenna supplied via USB port of connected spectrum analyzer or receiver (no battery needed)
- ▶ Low antenna weight ensures fatigue-free operation
- ▶ Can be mounted on a tripod (1/4" tripod thread)
- ▶ Adapter thread for a smartphone holder, tablet holder or mechanical compass

ORDERING INFORMATION

Designation	Type	Order No.
R&S®HE400 handheld directional antenna family		
Antenna handles		
Handheld directional antenna, 8 kHz to 8 GHz	R&S®HE400	4104.6000.02
Microwave handheld directional antenna, 20 MHz to 20 GHz	R&S®HE400MW	4104.6000.03
Basic handheld directional antenna, 8 kHz to 20 GHz	R&S®HE400BC	4104.6000.04
