

Description

Use for Fire service center to acquire firm alarm circuit.

Features

- * Standard rack mount design, 1U height, high-grade brushed aluminum panels, sophisticated technology, all show high-end temperament.
- * Equipment adopts embedded industrial-grade dual-core processing chip (ARM + DSP), start time is less than 1S.
- * 16 channel fire short circuit signal input, can be unlimited extension input interface, convenient for the larger system.
- * Support a key to restore the factory function, maximum convenient system maintenance and management.
- * Panel support a key to cancel the task.
- * Standard network interface, full-speed connections is up to 1000M.

Specifications

Model	T-7723
Network Interface	Standard RJ45 input
Transmission Rate	100Mbps
Support Agreement	TCP/IP, UDP, IGMP (multicast)
Short Circuit Interface	Industry standard wire terminals
Power Consumption	≤ 20W
Power Input	~190-240V 50/60Hz
Size	484mm×209mm×44mm
Weight	3Kg

Rear Panel
