#### **CAUTION**

Indicates a potentially hazardous situation which, if mishandled, could result in moderate or minor personal injury, and/or property damage.

- Avoid touching the unit's sharp metal edge to prevent injury.
- To avoid electric shocks, be sure to switch off the amplifier's power when connecting speakers.
- Do not operate the unit for an extended period of time with the sound distorting. This is an indication of a malfunction, which in turn can cause heat to generate and result in a fire.

### 2. GENERAL DESCRIPTION

Integrated with a speaker unit and panel, the PC-1869, PC-2369, PC-2852, and PC-2869 Ceiling Mount Speakers are of all metallic construction and ideal for use in a voice alarm system. They feature spring clamp mechanism for easy speaker mounting to the ceiling.

The input impedance can be easily changed by changing the tap position of the transformer.

The push-in type input terminal block makes cable connections easy and allows bridge wiring.

## 4. INSTALLATION

**Step 1.** Using the supplied paper pattern as a guide, open a mounting hole of the dimension specified below in the ceiling.

Model No.	$\phi A$
PC-1869	$\phi 150 \pm 3 \text{ mm } (\phi 5.91" \pm 0.12")$
PC-2369	$\phi 200 \pm 3 \text{ mm } (\phi 7.87" \pm 0.12")$
PC-2852/2869	$\phi 250 \pm 3 \text{ mm } (\phi 9.84" \pm 0.12")$

**Step 2.** Hook the speaker mounting spring into the mounting hole in the ceiling.

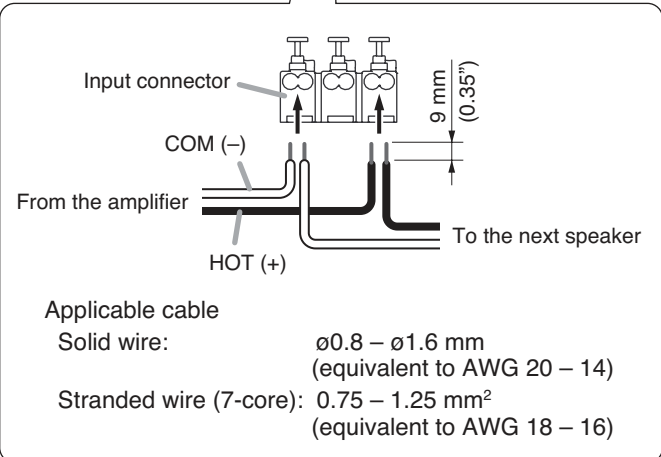

The figure shows PC-1869.

**Step 3.** Make wiring.

**3-1.** Insert the lead-in cables (cables from the amplifier) and lead-out cables (cables to other speakers) into the input connector.

[When making a bridge connection]

**3-2.** Change the input impedance as needed. The speaker's input is factory-preset to 1.7 k $\Omega$  (PC-1869, PC-2369 and PC-2869) or 670  $\Omega$  (PC-2852). When changing the input impedance, detach the black wire connected to the matching transformer, and reinsert it into the desired input tap referring to the tables below.

The figure shows the matching transformer of PC-1869/2369/2869.

[PC-1869/2369/2869]

Impedance	1.7 k $\Omega$	3.3 k $\Omega$	6.7 k $\Omega$	13 k $\Omega$
100 V line	6 W	3 W	1.5 W	0.8 W
70 V line	3 W	1.5 W	0.8 W	0.4 W

[PC-2852]

Impedance	330 $\Omega$	670 $\Omega$	1 k $\Omega$	2 k $\Omega$	3.3 k $\Omega$
100 V line	<del>15 W</del>	15 W	10 W	5 W	3 W
70 V line	15 W	7.5 W	5 W	2.5 W	1.5 W

Never connect to the 330  $\Omega$  tap in a 100V line system, as excessive input power is applied to the speaker, possibly resulting in damage.

**Step 4.** Push the panel surface into the mounting hole.
